#### **Major developments during the year**

The CIA President visited Russia and South Korea on a ballooning event promotion tour. Both countries have fast developing ballooning communities and are keen to get into the CIA event sanctioning process, in order to improve the quality and reliability of their events. Both visits resulted in bids for at least one CIA sanctioned event in the respective countries.

In September, our venerable and venerated President of Honour Karl Stefan chose to retire after many years from active service as Chairman of the CIA Records Subcommittee. With this note in my report, I would like to pay tribute to Karl for the eminent services rendered to the ballooning community within FAI.
