

My name is Bojan Gostojić. I am 13 years old and a member of Aeroclub Zrenjanin from Zrenjanin. Aeromodelling has always been a big part of my life. My father introduced me to this sport and from the beginning I was amazed by it. I immediately started to take interest in the models and the way they fly. I would not have experienced many things in my life if it wasn't for Aeromodelling. For instance, I've travelled to many countries around the world, found out about new cultures and met a lot of people, all thanks to this sport. I have a lot of friends from different countries who love Aeromodelling as much as I do and I am in contact with them almost every day. My knowledge in physics and aerodynamics has expanded a lot and it helped me achieve better grades in school. I have introduced a lot of my friends to Aeromodelling and since then many of them started to take interest in it. It's a shame that our town doesn't have a workshop because I think it would attract even more people. I am really sorry that this year I wasn't able to compete in Aeromodelling as much as in the previous years because I was more focused on school. This year I enrolled at Faculty of Mechanical Engineering. In the future

I will have to work harder and put more effort into both of these things but that won't be a problem for me because of how much I love Aeromodelling and because Aeromodelling makes it all worth it!
