# ● CIAM General Rules 11<sup>th</sup> March 2023 Zoom Technical Meeting

## ■ B.1.2.7 Category F9 - Drone Sport

*CIAM Bureau*

This category includes the following classes (provisional classes):

F9A - ~~RC~~ Drone Soccer

F9U - ~~RC Multi-rotor~~ Drone Racing

**Reason:** F3U RC Multi-rotor FPV Racing introduced 1<sup>st</sup> January 2016 as a new class in the category F3 Radio Controlled Flight.

New category F9 Drone Sport introduced 1<sup>st</sup> January 2019. So, F3U became F9U and had been renamed 'RC Multi-rotor Drone Racing'.

F9A Drone Soccer introduced 1<sup>st</sup> May 2019 in the Volume F9. By mistake, the F9A had been taken into account in the edition 2020 of the Volume CIAM General Rules as 'RC Drone Soccer' instead 'Drone Soccer'. This must be corrected.

In addition, it is proposed to only consider 'Drone Racing' to name the F9U class. Mention of 'RC Multi-rotor' is no more necessary.

***Unanimously recommended to the CIAM Plenary Meeting***

# FAI Sporting Code CIAM General Rules (2/2)

## ● CIAM General Rules 11<sup>th</sup> March 2023 Zoom Technical Meeting (continue)

### ■ C.15.1 CIAM championship naming policy

**CIAM Bureau**

Remove from the table the line 'F9U World (European) Championship for RC Multi-rotor Drone Racing'

**Reason:** Introduction on the table in CIAM General Rules Volume Edition 2019 does not result from a from rule change proposal.

A.9 'Only official classes may be considered for a World Championship status'..

F9U being still a provisional class cannot be considered for the World Championship status.

So, the CIAM championship naming policy must not apply to that class.

This does not prevent to recognise the WDRC as a CAT1 event.

***Unanimously recommended to the CIAM Plenary Meeting***

## **F9U change from provisional to official class? (1/2)**

- **CIAM General Rule A.9**

‘Only official classes may be considered for a World Championship status’

- **CIAM General Rule A.9.1**

‘Before being considered for adoption as an official FAI class, rules of the provisional class must first have been used in each year of a two-year period up to the year of consideration.

The rules must have been used in at least five international contests, or three World Cup contests. All the contests must be registered on the FAI Sporting Calendar and involve a total of at least five FAI member countries with at least two countries per contest and at least 50 competitors in total per year’.

- **CIAM General Rule A.10.2**

‘a) For official classes, a period of two years of no changes to model aircraft/space model specifications, manoeuvre schedules and rules will be strictly enforced.

...

d) Provisional classes are not subject to this two-year rule cycle.’

## F9U change from provisional to official class? (2/2)

- **CIAM General Rule C.2.1.1**

‘Each World Championship is normally held every other year (2-year cycle).’

- **CIAM General Rule C.14.1**

‘Before a class can be considered by the CIAM for a World and/or Continental Championship, there must be a minimum period of two years from the time the class becomes official.

The rules must have been used in at least five international contests, or three World Cup contests, each with a minimum of six FAI member countries participating. At least two contests must be held in each of the two years with a total of at least 60 competitors in each year.’

⇒ ***Recommendation expected from the Technical Meeting regarding change of F9U from provisional to official class***
